What is the Open Government Initiative

- An open government is one that listens TO and works WITH its citizens not just for its citizens
- Focuses on increasing access to information and data and meaningful opportunities for dialogue and collaboration with government
- Government-wide initiative via cabinet directive
- Office of Public Engagement's role as steward

Open Government Initiative

- Based on international standards and best practice
- Principles: **Transparency, Accountability, Participation and Collaboration**
- Open Government License
- 4 pillars:
 - Open Information
 - Open Data
 - Dialogue
 - Collaboration

Dialogue

The Government of Newfoundland and Labrador regularly seeks input and feedback on programs, services and matters of public policy.

We are reaching out to Newfoundlanders and Labradorians through a range of public engagement activities to capture ideas, insights and strengthen dialogue. Your involvement is important. With you, we will create the first Open Government Action Plan for our province. We will use online tools including social media and feedback forms, as well as in-person activities like face-to-face meetings and interactive sessions.

To make sure this Action Plan represents the views of Newfoundlanders and Labradorians, we will take time for meaningful discussion. Our approach involves your input as we move forward. Information gathered will be shared publicly, and key themes and early actions will be made available for review. Your feedback will help us identify the information of greatest value and issues of most importance to the people of the province.

Details of all public engagement activities for the Open Government Initiative will be listed on this webpage. We will

Goals

- Create opportunities for dialogue and participation.
- Support departments and agencies in the development of meaningful engagement activities.
- Enhance understanding of the importance of engagement processes.

What is Open data?

Open data refers to the release of government data, with an open licence, which is free of charge for anyone to use and reuse for any purpose.

Open data is provided in accessible formats, meaning that it is machine readable and is structured in a logical way. For numerical tabular files (spreadsheets), some common open formats include XLS or CSV. For text files, common formats include TXT.

For answers to some other questions around Open data, see the [Frequently Asked Questions \(FAQs\)](#).

Open data products

Products within the Open Data webpage consist of datasets, which are collections of data, and the applications built from these datasets.

The datasets are sourced directly from Government Departments and Agencies and can be tabular (tables of data, such as ferry on-time records) or spatial (based on mapping files, such as zone boundaries or location of hospitals). These datasets are processed by the [Newfoundland and Labrador Statistics Agency](#) before publication.

[Explore Open Data Catalog](#)

Browse the tabular and spatial Dataset catalogs, see our most viewed or most recently updated entries, or search the data sets by topic.

[Applications](#)

The webpage includes a variety of charts and maps, connected to individual data sets and demonstrating visual applications of the information.

Goals

- Promote disclosure of data.
- Encourage innovation through the sharing of data.

Collaboration

Through collaboration, we will work with partners, organizations and communities to achieve shared goals. We will share knowledge and resources to address issues, build consensus and identify potential solutions.

Our goal is to build a culture of collaboration within Newfoundland and Labrador. We want to create awareness of the value of collaboration and recognize that working together can be a more effective way to achieve our goals.

[Click here or the map below for Province-Wide Collaborative Work](#)

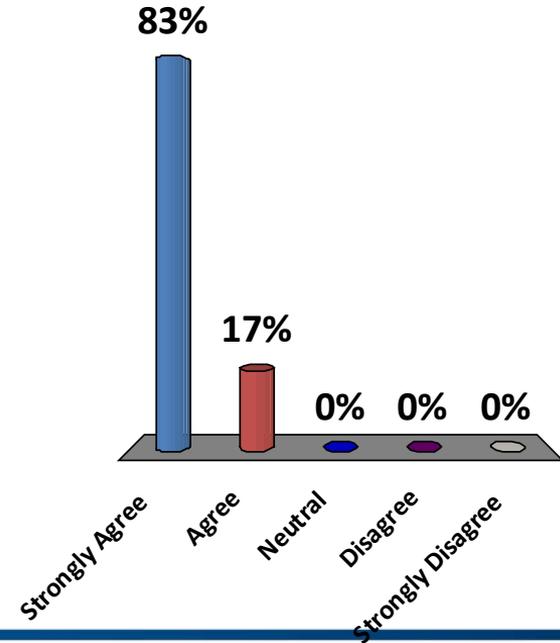

Goals

- Increase knowledge and awareness of the value of collaboration in addressing complex issues.
- Enhance capacity to effectively build and sustain appropriate collaborative structures.
